

Whey Concentration

PD 602 effectively controls foam and increases efficiency in whey evaporators. It promotes wetting of the evaporator surfaces and flow of the concentrated whey as it increases in solids. This results in less fouling, more efficient evaporation, and easier cleaning of evaporator surfaces.

UFA 450 was developed specifically for ultrafiltration systems designed to concentrate whey and for other membrane separations used in dairy manufacturing.

Air Release in sour cream, yogurt, cottage cheese and dips.

Magrabar manufacturers several antifoams designed to promote the smooth release of entrained air. We have antifoams based on vegetable oil, mineral oil, and silicone. These products come in various strengths so the antifoam can be matched to your application needs.

PD-655 series is a food grade antifoam designed to eliminate entrained air. The PD-655 series works well in a wide range of pH and temperatures.

J-305 is also an effective antifoam and promotes the smooth release of entrained air. This product is more effective at higher temperatures.

Silicone emulsions – Magrabar also manufactures a line of silicone products used in the dairy industry for air release and a variety of other applications.

CIP

Clean in place chemicals, used to keep process equipment free of buildup, often become very foamy as they become loaded with organic material. This can result in poor pumping behavior, a loss in the amount of usable process volume and even messy, potentially hazardous, overflowing tanks. Magrabar manufacturers several antifoams that knock down and hold down foam better than standard silicone emulsions used in CIP processes.

Organic Processing

Magrabar has developed the 3000 series of Organic compliant antifoams. They are registered with the WSDA and have been found to be effective in many of the uses detailed above. In addition they have been found to work extremely well in soy derived products such as soy milk and tofu.

All of Magrabar's antifoams are backed by our knowledgeable technical sales and customer support staff. Magrabar operates under a HACCP plan and is audited by a third party firm each year. We are proud of our food safety and security systems and earn high ratings from our auditors. Magrabar's products are also Kosher Pareve and Halal. 10-S, 20-S and 30-S are certified Kosher for Passover for year round use.
