

MAGRABAR® Egg Wash Defoamers

Magrabar offers a range of defoamers suitable for use in egg wash applications. Our silicone emulsion defoamers are widely used because of their excellent performance and low cost. We also manufacture egg wash defoamers that are compliant with the National Organic Program that have found success in certified organic egg processing.

SILICONE BASED DEFOAMERS

Silicone Emulsions - Magrabar manufactures 10%, 20% and 30% food grade, silicone emulsion antifoams. Our 10% silicone product, 10-S, is the most popular due to its low cost and high effectiveness. Our 20% silicone emulsion, 20-S, is even more economical since the applied cost is often lower and shipping costs are reduced.

MD-20-S FG - This is a 20% silicone defoamer in powder form. It has proven effective in powdered egg wash as both a primary and secondary defoamer.

ORGANIC COMPLIANT DEFOAMERS

Organic 3000 and 3300 - These are 100% active, vegetable oil-based defoamers which are registered with the Washington State Department of Agriculture (WSDA) and appear on the NOP compliant Brand Name Materials List. The two products differ in that ORGANIC 3000 is more emulsifiable than ORGANIC 3300 which can help knock-down foam more quickly. These products are so effective that some customers switch all of their antifoam purchases to them, even for non-organic eggs!

MD-3000 - This is a powdered version of our ORGANIC 3000 and can be used in organic processing where a solid antifoam is preferred.

All of Magrabar's antifoams are backed by our knowledgeable technical sales and customer support staff. Magrabar operates under a HACCP plan and is audited by a third party firm each year. We are proud of our food safety and security systems and earn high ratings from our auditors. Magrabar's products are also Kosher Pareve and Halal. 10-S, 20-S and 30-S are certified Kosher for Passover for year round use.
